

STIX v1.0 (Draft2) Schema Release Notes

The Version 1.0 (Draft2) release of the STIX schema is a minor update of Version 1.0 (Draft).

The primary change in this release is the importing of MAEC v3.0 instead of v2.1. This change resolves the namespace collision issue that existed in STIX Version 1.0 (Draft) with its import of MAEC v2.1. This change caused a ripple of sub-minor version releases in many of the STIX component schemas to maintain schema import alignment among them. In addition, a small number of changes were made to the Indicator and TTP component schemas fixing discovered issues and leading to new minor versions for these two components.

The STIX Version 1.0 (Draft2) schema release consists of the following schema elements:

- STIX schema_v1.0 (Draft2)
- STIX-Common schema_v0.2
- STIX-Indicator schema_v1.1
- STIX-Incident schema_v0.3.1
- STIX-TTP schema_v0.6
- STIX-ExploitTarget schema_v0.3.1
- STIX-COA schema_v0.3.1
- STIX-ThreatActor schema_v0.5.1
